

## **Join the IONIC Revolution with Crystal ION™ 120**

Crystal ION™ 120 is a trademarked product of Victoria's Essentials®. We are pleased to offer Savoy Baths & Day Spa customers this versatile and effective detoxification product. Due to its negative IONIC charge, Crystal ION™ 120 binds to moisture and creates a richer product. Crystal ION™ 120 is a fine powder that acts to detoxify the skin at a cellular level.

### **What is Crystal ION™ 120?**

Crystal ION™ 120 is a powder found in a remote location in Australia. Although it is also sourced Worldwide, Australian Crystal ION™ 120 is considered to be the finest for the use in Ionic Therapies. This is due to the purity of the Australian mining area.

Crystal ION™ 120 was formed over 300 million years ago when an enormous volcano erupted on the tablelands of NSW. The ash fell into a fresh water lake where it sat for millions of years. About 3 million years ago there was an earthquake of such magnitude that it tilted the now solid lake onto its edge and sank it deep into the ground. Crystal ION™ 120 currently mined covers many square kilometres in area and is in fact the tilted edge of the lake. It is also unique as it comes from a single deposit and therefore is more consistent in its quality and purity.

### **What are the cosmetic benefits of Crystal ION™ 120?**

As the cosmetic benefits have only recently been realised, Crystal ION™ 120 is new to body treatments. Due to its unique ability to extract, trap and eliminate free radicals and positive Ionic particles from the top two layers of the skin, Crystal ION™ 120 naturally revitalises, restores and replenishes the skin. Crystal ION™ 120's negative charge also amplifies the positive effects of the accompanying products in the particular blend. For example, when blended with Calendula Extract, Crystal ION™ 120 allows the Calendula's soothing properties to better act with the detoxified skin. The negatively charged ions make the final product creamier due to the amount of moisture retained by the Crystal ION.
